Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series)

Hitoshi Iba

Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series) Hitoshi Iba

Swarm-based multi-agent simulation leads to better modeling of tasks in biology, engineering, economics, art, and many other areas. It also facilitates an understanding of complicated phenomena that cannot be solved analytically. **Agent-Based Modeling and Simulation with Swarm** provides the methodology for a multi-agent-based modeling approach that integrates computational techniques such as artificial life, cellular automata, and bio-inspired optimization.

Each chapter gives an overview of the problem, explores state-of-the-art technology in the field, and discusses multi-agent frameworks. The author describes step by step how to assemble algorithms for generating a simulation model, program, method for visualization, and further research tasks. While the book employs the commonly used Swarm system, readers can model and develop the simulations with their own simulator. To encourage hands-on exploration of emergent systems, Swarm-based software and source codes are available for download from the author's website.

A thorough overview of multi-agent simulation and supporting tools, this book shows how this type of simulation is used to acquire an understanding of complex systems and artificial life. It carefully explains how to construct a simulation program for various applications.

From reader reviews:

Gary Lopez:

The e-book with title Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series) has lot of information that you can discover it. You can get a lot of advantage after read this book. This specific book exist new understanding the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This particular book will bring you in new era of the internationalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

Coralee Lowe:

Your reading 6th sense will not betray you, why because this Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series) publication written by well-known writer we are excited for well how to make book that could be understand by anyone who read the book. Written throughout good manner for you, leaking every ideas and writing skill only for eliminate your current hunger then you still doubt Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series) as good book but not only by the cover but also by content. This is one book that can break don't assess book by its cover, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already alerted you so why you have to listening to a different sixth sense.

Lauren Clarke:

You are able to spend your free time to study this book this book. This Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series) is simple bringing you can read it in the park, in the beach, train and soon. If you did not include much space to bring typically the printed book, you can buy the particular e-book. It is make you much easier to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Victoria Austin:

A lot of publication has printed but it differs from the others. You can get it by online on social media. You can choose the most effective book for you, science, witty, novel, or whatever by simply searching from it. It is known as of book Agent-Based Modeling and Simulation with Swarm (Chapman & Hall/CRC Studies in Informatics Series). You can include your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make you happier to read. It is most critical that, you must aware about guide. It can bring you from one location to other place.
