## Programming the Perl DBI: Database programming with Perl Tim Bunce, Alligator Descartes

One of the greatest strengths of the Perl programming language is its ability to manipulate large amounts of data. Database programming is therefore a natural fit for Perl, not only for business applications but also for CGI-based web and intranet applications. The primary interface for database programming in Perl is DBI. DBI is a database-independent package that provides a consistent set of routines regardless of what database product you use--Oracle, Sybase, Ingres, Informix, you name it. The design of DBI is to separate the actual database drivers (DBDs) from the programmer's API, so any DBI program can work with any database, or even with multiple databases by different vendors simultaneously. *Programming the Perl DBI* is coauthored by Alligator Descartes, one of the most active members of the DBI community, and by Tim Bunce, the inventor of DBI. For the uninitiated, the book explains the architecture of DBI and shows you how to write DBI-based programs. For the experienced DBI dabbler, this book reveals DBI's nuances and the peculiarities of each individual DBD. The book includes:

- An introduction to DBI and its design
- How to construct queries and bind parameters
- Working with database, driver, and statement handles
- Debugging techniques
- Coverage of each existing DBD
- A complete reference to DBI

This is the definitive book for database programming in Perl.

### **From reader reviews:**

#### **Larry Turner:**

What do you concerning book? It is not important along? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They have to answer that question simply because just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on kindergarten until university need this kind of Programming the Perl DBI: Database programming with Perl to read.

#### **Bruce Smith:**

Reading a guide tends to be new life style on this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Together with book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only situation that share in the books. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their proficiency in writing, they also doing some research before they write to the book. One of them is this Programming the Perl DBI: Database programming with Perl.

#### **Rosa Rodriguez:**

Reading can called mind hangout, why? Because when you are reading a book specially book entitled Programming the Perl DBI: Database programming with Perl your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can be your mind friends. Imaging every word written in a guide then become one contact form conclusion and explanation that maybe you never get before. The Programming the Perl DBI: Database programming with Perl giving you one more experience more than blown away your brain but also giving you useful info for your better life in this era. So now let us show you the relaxing pattern is your body and mind will be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

#### **Syble Mills:**

As a student exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you personally.

As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Programming the Perl DBI: Database programming with Perl can make you really feel more interested to read.
