Speech Enhancement: Theory and Practice (Signal Processing and Communications)

Philipos C. Loizou

Speech Enhancement: Theory and Practice (Signal Processing and Communications) Philipos C. Loizou

The first book to provide comprehensive and up-to-date coverage of all major speech enhancement algorithms proposed in the last two decades, **Speech Enhancement: Theory and Practice** is a valuable resource for experts and newcomers in the field. The book covers traditional speech enhancement algorithms, such as spectral subtraction and Wiener filtering algorithms as well as state-of-the-art algorithms including minimum mean-squared error algorithms that incorporate signal-presence uncertainty and subspace algorithms that incorporate psychoacoustic models. The coverage includes objective and subjective measures used to evaluate speech quality and intelligibility.

Divided into three parts, the book presents the digital-signal processing and speech signal fundamentals needed to understand speech enhancement algorithms, the various classes of speech enhancement algorithms proposed over the last two decades, and the methods and measures used to evaluate the performance of speech enhancement algorithms. The text is supplemented with examples and figures designed to help readers understand the theory. MATLAB® implementations of all major speech enhancement algorithms and a speech database that can be used for evaluation of noise reduction algorithms are available for download on the book's description page at the CRC Press website.

Providing clear and concise coverage of the subject, the author brings together a large body of knowledge about how human listeners compensate for acoustic noise when in noisy environments. This book is a valuable resource not only for engineers who want to implement the latest speech enhancement algorithms but also for speech practitioners who want to incorporate some of these algorithms into hearing aid applications for speech intelligibility and/or quality improvement.

A download is available for those that purchase this book and can be obtained by contacting nora.konopka@taylorandfrancis.com, providing proof of purchase. ?

From reader reviews:

Karla Walker:

Book is to be different for each grade. Book for children until adult are different content. As it is known to us that book is very important usually. The book Speech Enhancement: Theory and Practice (Signal Processing and Communications) ended up being making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The book Speech Enhancement: Theory and Practice (Signal Processing and Communications) is not only giving you considerably more new information but also to be your friend when you really feel bored. You can spend your personal spend time to read your guide. Try to make relationship while using book Speech Enhancement: Theory and Practice (Signal Processing and Communications). You never feel lose out for everything when you read some books.

Robert Clift:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book method, more simple and reachable. This Speech Enhancement: Theory and Practice (Signal Processing and Communications) can give you a lot of close friends because by you looking at this one book you have point that they don't and make anyone more like an interesting person. This specific book can be one of a step for you to get success. This publication offer you information that probably your friend doesn't understand, by knowing more than other make you to be great individuals. So , why hesitate? We need to have Speech Enhancement: Theory and Practice (Signal Processing and Communications).

Margo Soares:

That guide can make you to feel relax. This particular book Speech Enhancement: Theory and Practice (Signal Processing and Communications) was colourful and of course has pictures around. As we know that book Speech Enhancement: Theory and Practice (Signal Processing and Communications) has many kinds or type. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading that will.

Kimberly Casselman:

What is your hobby? Have you heard this question when you got pupils? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person just like reading or as studying become their hobby. You should know that reading is very important and also book as to be the thing. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Different categories of books that can you take to be your object. One of them is Speech Enhancement: Theory and Practice (Signal Processing and Communications).
