Can students learn from simply asking questions--even ones that may never have answers?

Vincent Ciardiello suggests that to truly learn, students should be puzzled about new knowledge. Question-finding, the unique strategy described in this book, fosters this learning by leading adolescent students to probe the multiple meanings of text and ask challenging, open-ended questions. Focus units illustrate how you can use question-finding across the curriculum.

In each chapter, the author encourages you to "pause and ponder" and "ponder and practice" to reinforce and apply the question-finding concepts.

Other practical tools include:

An annotated list of materials and resources that stimulate question-finding

A sample lesson plan that demonstrates the strategy

A glossary of important concepts and specialized terms that help you understand the question-finding process

Use this resource to motivate and engage your students and help them become independent readers and inquirers.
