Controversial Issues in Energy Policy (Controversial Issues in Public Policy) Alfred A. Marcus

How has the world coped with past energy crises? In this volume, Marcus reveals both the shortcomings and failures and the surprising successes of past efforts. With the decline of the Cold War, energy policy issues are among the most important factors in world politics. Energy policies provide a new context for the evolution of other internationally significant policies; namely, global trade, new Eastern European economies and emerging environmental issues. Introducing energy issues by reviewing events which transpired in the Persian Gulf after August 1990, Marcus then examines trends in energy production and consumption worldwide since the first energy supply crisis of 1973. Ensuing chapters discuss the economics and the politics of energy policy.
