# Landscapes and Landforms of France (World Geomorphological Landscapes)

## Landscapes and Landforms of France (World Geomorphological Landscapes)

The Landforms and Landscapes of France provides an informative and attractive overview of the most scenic landscapes of France. The geodiversity of France is emphasized, for example the glacial landscapes of the Mont-Blanc Massif, the volcanoes of the French Massif Central, the chalk cliffs and sand dunes of the Atlantic coast, the granitic landscapes of Corsica or the lagoons and coral reefs of French Polynesia.

The objectives are to provide the reader with an enjoyable and informative description of the selected sites within their regional geographical and geological settings; to offer an up-to-date survey of the evolution of France's landscape; and to give additional information on the cultural value of the selected sites wherever appropriate (prehistoric paintings, legends related to sites, famous vineyards, etc.).

The book is a richly illustrated reference work that makes accessible for the first time a wealth of information currently scattered among many national and regional journals. It will be of benefit to earth scientists, environmental scientists, tourism geographers and conservationists
