A One-Stop Guide to Managing LEED-New Construction Projects

This *GreenSource* book explains, step by step, how to integrate LEED-New Construction (NC) rating system requirements into the building design and construction processes. Project planning, goals, coordination, implementation, and documentation are covered in detail.

LEED-New Construction Project Management provides a tested framework for taking a project from inception to successful certification and shows you how to master the tools to make the process more efficient. Three in-depth case studies covering new commercial building construction, major renovations, and a portfolio of buildings highlight the strategies presented in the book.

LEED-New Construction Project Management covers:

- The LEED rating system and LEED-NC credit categories
- The project management process
- Project definition and goal setting
- Design phase integration
- Construction phase implementation
- The LEED process: adaptability, applicability, and best practices
- Future trends
- Credit implementations: sustainable sites; water efficiency; energy and atmosphere; materials and resources; indoor environmental quality; innovation in design
