By the year 2660, science has transformed and conquered the world, rescuing humanity from itself. Spectacular inventions from the farthest reaches of space and deep beneath the earth are available to meet every need, providing antidotes to individual troubles and social ills. Inventors are highly prized and respected, and they are jealously protected and lavishly cared for by world governments. That support and acclaim, however—as the most brilliant of scientists, Ralph 124C 41+, discovers—is not without its price.

This visionary novel of the twenty-seventh century was written by Hugo Gernsback (1887–1964), founder of the influential magazine *Amazing Stories*. Marvelously prophetic and creative, *Ralph 124C 41+* celebrates technological advances and entrances readers with an exuberant, unforgettable vision of what our world might become. This commemorative edition makes this landmark tale widely available for the first time in decades and features the prized Frank R. Paul illustrations from the rare first edition, a list of inventions and technological devices, and Hugo Gernsback's prefaces to the first and second editions.
