## **The Philosophy of Information** Luciano Floridi

Luciano Floridi presents a book that will set the agenda for the philosophy of information. Pi is the philosophical field concerned with (1) the critical investigation of the conceptual nature and basic principles of information, including its dynamics, utilisation, and sciences, and (2) the elaboration and application of information-theoretic and computational methodologies to philosophical problems. This book lays down, for the first time, the conceptual foundations for this new area of research. It does so systematically, by pursuing three goals. Its metatheoretical goal is to describe what the philosophy of information is, its problems, approaches, and methods. Its introductory goal is to help the reader to gain a better grasp of the complex and multifarious nature of the various concepts and phenomena related to information. Its analytic goal is to answer several key theoretical questions of great philosophical interest, arising from the investigation of semantic information.

#### **Rodolfo Born:**

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just little students that has reading's internal or real their interest. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this The Philosophy of Information can make you feel more interested to read.
