Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41)

Tom M. Apostol

Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41)

Tom M. Apostol

A new edition of a classical treatment of elliptic and modular functions with some of their number-theoretic applications, this text offers an updated bibliography and an alternative treatment of the transformation formula for the Dedekind eta function. It covers many topics, such as Hecke's theory of entire forms with multiplicative Fourier coefficients, and the last chapter recounts Bohr's theory of equivalence of general Dirichlet series.

From reader reviews:

John Pasko:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a book. Beside you can solve your condition; you can add your knowledge by the reserve entitled Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41). Try to make book Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41) as your friend. It means that it can for being your friend when you feel alone and beside that of course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know every little thing by the book. So , let me make new experience and knowledge with this book.

Mary Bunch:

Throughout other case, little folks like to read book Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41). You can choose the best book if you love reading a book. Providing we know about how is important a new book Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41). You can add know-how and of course you can around the world by just a book. Absolutely right, due to the fact from book you can realize everything! From your country till foreign or abroad you may be known. About simple thing until wonderful thing you could know that. In this era, you can open a book as well as searching by internet gadget. It is called e-book. You may use it when you feel fed up to go to the library. Let's study.

Sam Current:

What do you think about book? It is just for students since they are still students or this for all people in the world, exactly what the best subject for that? Merely you can be answered for that issue above. Every person has distinct personality and hobby for each other. Don't to be compelled someone or something that they don't would like do that. You must know how great and also important the book Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41). All type of book is it possible to see on many methods. You can look for the internet sources or other social media.

Norman Duque:

Some individuals said that they feel bored when they reading a reserve. They are directly felt that when they get a half portions of the book. You can choose the actual book Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41) to make your current reading is interesting. Your own personal skill of reading talent is developing when you including reading. Try to choose easy book to make you enjoy to see it and mingle the idea about book and reading especially. It is to be initial opinion for you to like to start a book and study it. Beside that the guide Modular Functions and Dirichlet Series in Number Theory (Graduate Texts in Mathematics) (v. 41) can to be your brand-new friend when you're sense

alone and confuse with what must you're doing of that time.
