Ratner's Theorems on Unipotent Flows (Chicago Lectures in Mathematics) Dave Witte Morris

The theorems of Berkeley mathematician Marina Ratner have guided key advances in the understanding of dynamical systems. Unipotent flows are well-behaved dynamical systems, and Ratner has shown that the closure of every orbit for such a flow is of a simple algebraic or geometric form. In *Ratner's Theorems on Unipotent Flows*, Dave Witte Morris provides both an elementary introduction to these theorems and an account of the proof of Ratner's measure classification theorem.

A collection of lecture notes aimed at graduate students, the first four chapters of *Ratner's Theorems on Unipotent Flows* can be read independently. The first chapter, intended for a fairly general audience, provides an introduction with examples that illustrate the theorems, some of their applications, and the main ideas involved in the proof. In the following chapters, Morris introduces entropy, ergodic theory, and the theory of algebraic groups. The book concludes with a proof of the measure-theoretic version of Ratner's Theorem. With new material that has never before been published in book form, *Ratner's Theorems on Unipotent Flows* helps bring these important theorems to a broader mathematical readership.

From reader reviews:

Mildred Smith:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each guide has different aim or even goal; it means that guide has different type. Some people truly feel enjoy to spend their time and energy to read a book. These are reading whatever they take because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book when they found difficult problem or even exercise. Well, probably you should have this Ratner's Theorems on Unipotent Flows (Chicago Lectures in Mathematics).

Eduardo Ford:

The reserve with title Ratner's Theorems on Unipotent Flows (Chicago Lectures in Mathematics) possesses a lot of information that you can study it. You can get a lot of benefit after read this book. This kind of book exist new knowledge the information that exist in this publication represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This book will bring you within new era of the internationalization. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Joshua Cameron:

Reading a book being new life style in this 12 months; every people loves to learn a book. When you study a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Ratner's Theorems on Unipotent Flows (Chicago Lectures in Mathematics) provide you with a new experience in looking at a book.

Josephine Draughn:

A lot of guide has printed but it differs. You can get it by world wide web on social media. You can choose the most effective book for you, science, witty, novel, or whatever by searching from it. It is referred to as of book Ratner's Theorems on Unipotent Flows (Chicago Lectures in Mathematics). You can add your knowledge by it. Without causing the printed book, it could add your knowledge and make a person happier to read. It is most important that, you must aware about publication. It can bring you from one destination for a other place.
