Berkovich Spaces and Applications (Lecture Notes in Mathematics)

Berkovich Spaces and Applications (Lecture Notes in Mathematics)

We present an introduction to Berkovich's theory of non-archimedean analytic spaces that emphasizes its applications in various fields. The first part contains surveys of a foundational nature, including an introduction to Berkovich analytic spaces by M. Temkin, and to étale cohomology by A. Ducros, as well as a short note by C. Favre on the topology of some Berkovich spaces. The second part focuses on applications to geometry. A second text by A. Ducros contains a new proof of the fact that the higher direct images of a coherent sheaf under a proper map are coherent, and B. Rémy, A. Thuillier and A. Werner provide an overview of their work on the compactification of Bruhat-Tits buildings using Berkovich analytic geometry. The third and final part explores the relationship between non-archimedean geometry and dynamics. A contribution by M. Jonsson contains a thorough discussion of non-archimedean dynamical systems in dimension 1 and 2. Finally a survey by J.-P. Otal gives an account of Morgan-Shalen's theory of compactification of character varieties.

This book will provide the reader with enough material on the basic concepts and constructions related to Berkovich spaces to move on to more advanced research articles on the subject. We also hope that the applications presented here will inspire the reader to discover new settings where these beautiful and intricate objects might arise.

From reader reviews:

Shirley Kistner:

Book is to be different for each grade. Book for children until eventually adult are different content. We all know that that book is very important normally. The book Berkovich Spaces and Applications (Lecture Notes in Mathematics) had been making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The guide Berkovich Spaces and Applications (Lecture Notes in Mathematics) is not only giving you far more new information but also being your friend when you experience bored. You can spend your spend time to read your reserve. Try to make relationship with the book Berkovich Spaces and Applications (Lecture Notes in Mathematics). You never feel lose out for everything when you read some books.

Deborah Allen:

In this period of time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. The actual book that recommended for your requirements is Berkovich Spaces and Applications (Lecture Notes in Mathematics) this book consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The terminology styles that writer value to explain it is easy to understand. The writer made some study when he makes this book. This is why this book ideal all of you.

Donna Salerno:

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy regarding reading. Some people likes reading, not only science book but novel and Berkovich Spaces and Applications (Lecture Notes in Mathematics) or maybe others sources were given know-how for you. After you know how the truly great a book, you feel need to read more and more. Science book was created for teacher or students especially. Those publications are helping them to bring their knowledge. In additional case, beside science e-book, any other book likes Berkovich Spaces and Applications (Lecture Notes in Mathematics) to make your spare time much more colorful. Many types of book like here.

Walter Rojas:

As a college student exactly feel bored to help reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just little students that has reading's soul or real their passion. They just do what the educator want, like asked to the library. They go to right now there but nothing reading really. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach

Chinese's country. Therefore , this Berkovich Spaces and Applications (Lecture Notes in Mathematics) can make you really feel more interested to read.
