Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux Igor Ljubuncic

Problem-Solving in High Performance Computing: A Situational Awareness Approach with Linux focuses on understanding giant computing grids as cohesive systems. Unlike other titles on general problem-solving or system administration, this book offers a cohesive approach to complex, layered environments, highlighting the difference between standalone system troubleshooting and complex problem-solving in large, mission critical environments, and addressing the pitfalls of information overload, micro, and macro symptoms, also including methods for managing problems in large computing ecosystems.

The authors offer perspective gained from years of developing Intel-based systems that lead the industry in the number of hosts, software tools, and licenses used in chip design. The book offers unique, real-life examples that emphasize the magnitude and operational complexity of high performance computer systems.

- Provides insider perspectives on challenges in high performance environments with thousands of servers, millions of cores, distributed data centers, and petabytes of shared data
- Covers analysis, troubleshooting, and system optimization, from initial diagnostics to deep dives into kernel crash dumps
- Presents macro principles that appeal to a wide range of users and various real-life, complex problems
- Includes examples from 24/7 mission-critical environments with specific HPC operational constraints

From reader reviews:

Eleanor Williams:

Information is provisions for individuals to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider any time those information which is inside the former life are hard to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you receive the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux as your daily resource information.

Virgie Tauber:

This Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux is great reserve for you because the content and that is full of information for you who else always deal with world and possess to make decision every minute. This book reveal it details accurately using great plan word or we can state no rambling sentences within it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tough core information with beautiful delivering sentences. Having Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux in your hand like having the world in your arm, data in it is not ridiculous just one. We can say that no e-book that offer you world with ten or fifteen moment right but this reserve already do that. So , this really is good reading book. Hey there Mr. and Mrs. hectic do you still doubt in which?

Bruce Jackson:

Is it you who having spare time after that spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux can be the answer, oh how comes? A book you know. You are therefore out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Mark Brainerd:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as reading become their hobby. You should know that reading is very important and also book as to be the thing. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is Problem-solving in High Performance Computing: A Situational Awareness Approach with Linux.
