Virtually every method of handling an injury or illness in a wilderness context is different from what you would expect in an urban environment. The remoteness from civilization, the lack of readily available medical assistance, the difficulty of having to handle serious injuries on your own - often for many hours or potentially even days - can be extremely daunting if you are not prepared. This handy pocket field guide is designed to help identify, manage (and treat) and when possible, prevent common injuries and illnesses in the field.
